

Growing Recipe

HEUCHERELLA 'SWEET TEA'

Approximate Finish Time From Liner

 = Minimum  = Maximum

pH: 5.6 - 6.8

Fertilization Recommendations: 100 - 150 PPM

EC: 0.6 - 0.9

Light Levels: Part shade / morning sun

Water Requirements: Dry moderately between waterings

Hardiness Zones: 4 - 9

Possible Problems: Insect: Foliar nematodes may be a problem for gardens in susceptible areas and watch for root weevils.

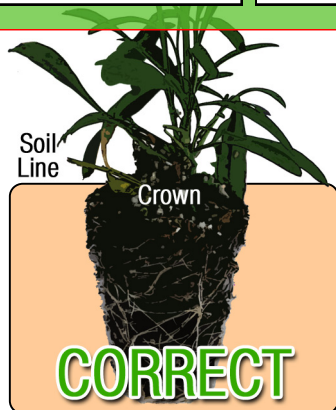

Habit: Mounding

Diseases: Root rot may occur with excessive soil moisture or poor drainage. **Note**: All Heucherella are rust resistant.

Day Length for Flowering: Day neutral

Do NOT bury the crown of the plug

Description

Huge cinnamon stars are surrounded by the loveliest orange tea colored borders. A new, instant classic for containers and garden. Undeniably the most intensely colored Heucherella ever! The big, palmately cut leaves darken in the summer and lighten up again in the fall. Its *H. villosa* breeding gives it a big bold habit.
