Hardiness Zones: 6 - 9	Possible Problems: <u>Insect</u> : No major pests <u>Diseases</u> : No major diseases	
Habit: Clumping		
Day Length for Flowering: Day neutral		

Do NOT bury the crown of the plug

Description

The POCO™ Series is characterized by its short habits that form multiple crowns quickly and each crown produces flowers on short spikes in the first season. The flower spikes are bicolor red-orange and orange and the plants have very long bloom time with repeat blooming from July through October in Canby, Oregon. The short leaves are narrow and grassy. Plants have excellent vigor.
