Habit: Mounding

Diseases: Root rot may occur with excessive soil moisture. Powdery mildew, rust, and leaf spots may occur.

Day Length for Flowering: Day neutral

Do NOT bury the crown of the plug

Description

A most curious Heuchera! 'Changeling' is so named because of the unique characteristic of changing colors every week or so. From top to bottom, new color emerge. New foliage starts off blushing peach and cherry and changes to champagne and taupe, finally ending up several shades of celadon green, pine, and moss. The strong H. americana bloodline enhances this plant with a sharp, silver veil that highlights the contrasting veins.
